

## SAFE EXPERIMENTING IN CLASS MODERN MEASURING INSTRUMENTS

3bscientific.com

Power supplies • Multimeters • Function generators • Oscilloscopes • Digital thermometers • Sound level meters • pH meters • Geiger counters • Measurement amplifiers

### Dear Customers,

Carrying out experiments on one's own is a fascinating and important part of any science lesson. Of course, though, it is essential never to lose sight of students' safety. Student experiments on open electric circuits, for instance, are particularly demanding in terms of electrical safety.

In this brochure we have put together a selection of electricity power supplies for you, each of which is equipped with a safety transformer compliant with European standard EN 61558-2-6 and guarantees safe isolation between the mains supply and output circuitry.

It goes without saying that our measuring instruments also meet the utmost demands for electrical safety. For analogue voltage and current measurements, we recommend using our ESCOLA range of multimeters and our new demo-multimeter or, for measuring very small charges, currents and voltages, our electrometer or the new U-series measurement amplifier.

Moreover, we also offer you a selection of modern digital measuring instruments. Among the new items in the range are two inexpensive digital oscilloscopes, a thermal imaging camera, an infra-red thermometer, two pH meters and a laser range finder. See for yourselves the many and varied uses to which they can be put.

Our whole project range for physics can be found in our 3B Scientific Physics catalogue or online at **3bscientific.com**.

If you do not have the catalogue to hand at the moment, that is no problem. We will be happy to send you your own personal example. Alternatively you can simply visit us online. All of our catalogues are available for download in PDF format.

We hope you have a lot of fun in discovering our selection of new products. We would always be happy to hear from you about your needs or suggestions and look forward to your ordering from us. Our expert team is of course at your disposal at any time for personal advice.

Yours faithfully,

Dr. Johannes Selbach Head of Product Management Natural Sciences

### Ideal for electron tubes!

### **ADVANTAGES**

- + Very high-quality and extremely lightweight equipment in modern casing
- + 3-digit digital display for high voltage
- + Regulated high-voltage output not dependent on mains voltage
- + High-voltage-proof supply for heater voltage
- + No need to change fuses

#### High-Voltage Power Supply E (230 V, 50/60 Hz)

Universally applicable, floating high-voltage source for electrostatic experiments and for operating spectral tubes, gas discharge tubes and electron tubes. With built-in transformer resistance to external voltage to provide the heating voltage for electron tubes. Continuously adjustable high-voltage source, which is safe to touch, with passive current limiting and digital voltage display.

- · Current limiting to protect against contact with high voltages
- Safety transformer conforming to EN 61558-2-6
- Safe isolation between power supply and output circuits

High-voltage output:

0 - 5000 V DC, max. 2 mA, floating Heater voltage output: 6.3 V AC, max. 3 A, resistance to voltage up to 5 kV

U8498294-230

Ideal for experiments on electrostatics!

## > NEW!

#### High-Voltage Power Supply 10 kV (230 V, 50/60 Hz)

Universally applicable, floating high-voltage source for experiments on electrostatics or for operating electron tubes. With built-in transformer resistance to external voltage to provide the heating voltage for electron tubes. Continuously adjustable high-voltage source, which is safe to touch, with passive current limiting and digital voltage display. A temperature-controlled fan protects the equipment from overheating.

- · Current limiting to protect against contact with high voltages
- Safety transformer conforming to EN 61558-2-6
- · Safe isolation between power supply and output circuits

High-voltage output:

0 – 10000 V DC, max. 2 mA, floating Heater voltage output: 6.3 V AC, max. 3 A, resistance to voltage up to 10 kV

U8557480-230

### WITH 3B PRODUCTS - SAFE EXPERIMENTING IN CLASS!

#### Transformer 12 V, 25 VA (230 V, 50/60 Hz)

Simple transformer for student exercises. Short circuit proof, with connection leads and two cascadable 4 mm safety plugs.

- Safety extra-low voltage (SELV) and functional extra-low voltage (FELV)
- Safety transformer conforming to EN 61558-2-6
- Safe isolation between power supply and output circuits

U33300-230

#### Transformer 12 V, 60 VA (230 V, 50/60 Hz)

Powerful electronic power supply, e.g. for the operation of lamps as used in optics. Short circuit proof, with connection leads and two cascadable 4 mm safety plugs.

- Safety extra-low voltage (SELV) and functional extra-low voltage (FELV)
- Safety transformer conforming to EN 61558-2-6
- · Safe isolation between power supply and output circuits

#### Transformer with Rectifier 3/ 6/ 9/ 12 V, 3 A (230 V, 50/60 Hz)

Extra low voltage power supply with overload protection contained in plastic housing. Output voltage switchable in four stages.

- Safety extra-low voltage (SELV) and functional extra-low voltage (FELV)
- Safety transformer conforming to EN 61558-2-6
- · Safe isolation between power supply and output circuits

## Especially safe!

## Transformer with Rectifier 2/ 4/ 6/ 8/ 10/ 12/ 14 V, 5 A (230 V, 50/60 Hz)

Safety isolating transformer with safety cut out contained in metal housing. Output voltage switchable in 7 steps

- Safety extra-low voltage (SELV) and functional extra-low voltage (FELV)
- Safety transformer conforming to EN 61558-2-6
- Safe isolation between power supply and output circuits

AC output: DC output: Dimensions: Weight: U8521112-230 2/ 4/ 6/ 8/ 10/ 12/ 14 V, max. 5 A 2/ 4/ 6/ 8/ 10/ 12/ 14 V, max. 5 A 260x140x130 mm<sup>3</sup> approx. 3.1 kg approx.

#### DC Power Supply 1.5 - 15 V, 1.5 A (230 V, 50/60 Hz)

Handy DC power supply contained in a sturdy metal housing. The output voltage is continuously adjustable and is displayed via an analogue measuring instrument. The output is short circuit proof and floating.

- Safety extra-low voltage (SELV) and functional extra-low voltage (FELV)
- Safety transformer conforming to EN 61558-2-6
- Safe isolation between power supply and output circuits

# More Power Supplies at 3bscientific.com!

U8521131-230

#### AC/DC Power Supply 0 - 20 V, 5 A (230 V, 50/60 Hz)

Power supply with adjustable and stabilised DC voltage and analogue voltage and current display for DC voltage. The DC voltage component features an automatically alternating voltage and current control and is protected against continuous short circuits. The AC voltage can be selected in eight steps, the output is protected by an overcurrent circuit breaker.

- Safety extra-low voltage (SELV) and functional extra-low voltage (FELV)
- Safety transformer conforming to EN 61558-2-6
- Safe isolation between power supply and output circuits

DC output: AC output: Residual ripple: Dimensions: Weight: U8521131-230 0 - 20 V, 0 - 5 A 2, 4, 6, 8, 10, 12, 15, 20 V, max. 5 A <10 mV 235x175x245 mm<sup>3</sup> approx. 8 kg approx.

#### Analogue Multimeters ESCOLA

Clear moving-coil instrument in shock-resistant plastic casing with two mirrored linear scales and clearly distinguishable measuring ranges. Includes battery test function and display of charge status as well as electronic calibration of zero point to the centre of the scale for all DC current and voltage ranges.

Use of a measurement amplifier ensures the measured values are linear even for AC voltages of up to 40 kHz. Only an inexpensive 1.5 V battery element is needed for operation. Nevertheless the meter will work for several years after any change of battery with normal usage, since the current discharge when in operation is no more than 2.5 mA maximum.

Scale length: Operating voltage: Battery type: Accuracy: Dimensions: Weight:

80 mm 1-3.5 V DC Mignon, AA, R6 Class 2 (DC), class 3 (AC) 100x150x50 mm<sup>3</sup> approx. 300 g approx.

### THE IDEAL METER FOR STUDENT EXPERIMENTS

- + Unmistakeable measurement readings
- + Only an inexpensive 1.5 V battery element is needed for operation
- + Full functionality guaranteed even when the battery is no longer fully charged
- + Lithium batteries with higher open-circuit voltage can also be used
- + Battery protected by automatic cut-off after approximately 50 mins.
- + Distinct difference between 0 V display and the equipment being switched off due to inherently different position of needle

#### Analogue Multimeter ESCOLA 30

Permanently short-circuit-proof student measuring instrument for measuring voltage and current in the safety extra-low voltage range. The electronic overload protection is achieved without the use of an equipment fuse, therefore obviating any need to change fuses or order spares. The protective system nevertheless operates without any auxiliary energy and is guaranteed even when the battery is flat or no battery is present.

Direct and alternating voltage: 0.3 - 30 V, 5 ranges each Direct and alternating current: Instrument category: U8557330

1 – 3000 mA, 5 ranges each CAT I, 30 V

Electrical safety of measuring instruments for current and voltage are assessed according to measurement categories stipulated in IEC 61010-1:

CAT I or unstipulated: Approved for measurements in circuits which are not directly connected to the low voltage mains grid (e.g. batteries).

CAT II: Approved for measurements in circuits which are directly connected, by a mains lead and plug for instance, to the low voltage mains grid (e.g. household or office appliance and lab equipment).

#### Analogue Multimeter ESCOLA 100

Meter for classroom and practical experiments to measure voltage and current up to 600 V or 10 A respectively. Also features audible continuity testing. Includes a fuse to guarantee safety up to CAT III. The separate terminal sockets for current and voltage permit connection of the instrument that allows for current as well as voltage to be measured without having to reconnect the measuring leads. When switching from one measuring range to another, the circuit is never broken. All current measuring ranges are overload-proof for longterm current of up to 10 A.

Direct and alternating voltage: 0.1 - 600 V, 9 ranges each Direct and alternating current: Instrument category: U8557380

0.1 mA - 3000 mA, 11 ranges each CAT III, 600 V

CAT III: Approved for measurements in circuits which are part of a building's wiring installation (e.g. stationary consumers, distribution terminals, appliances connected directly to the distribution box).

CAT IV: Approved for measurements in circuits which are directly connected to the source of the low voltage mains (e.g. electricity meters, main service feed, primary excess voltage protection). Note: the closer measurement is to be made to the low-voltage mains installation, the higher the measuring category needs to be.

Easy to

## > NEW!

**Demo Multimeter** 

Electronic meter featuring a double scale for analogue measurement of current and voltage in demonstration experiments. It can handle measurements of current and voltage values and also allows the zero point to be set up in the centre of the scale for measurement of DC quantities. Switching between measuring ranges does not break any circuits connected to the equipment. This means it is possible to carry out measurements on voltage converters, for example, without causing induction surges. Resistance R, conductance G, impedance Z and admittance Y can easily be determined as quotients of current and voltage measurements thanks to the non-interrupting switch capability without the need to change the wiring.

This equipment is protected by fuses and authorised for making measurements in circuits directly connected to the low-voltage mains via plugs (CAT II), i.e. for measurements on house-hold appliances, for example. The current measuring ranges are resistant to long-term overloading up to 10 A. The meter is suitable for use as a free-standing instrument or for setting up in training panel frames.

Voltage ranges: Current ranges: Measuring category: Dimensions: Weight: U8557160 0.1 - 600 V AC/DC, 9 ranges 0.1 mA - 10 A AC/DC, 11 ranges CAT II: 600 V 259x297x125 mm<sup>3</sup> approx. 1.7 kg approx.

#### **Digital Mini Multimeter**

Very reasonably priced mini multimeter in pocket format for measuring voltage, DC current, resistance and temperature and also including diode and continuity tests. Overload protection for mA ranges, 10 amp range is unprotected. Includes measuring leads, type K thermocouple and battery.

DC voltage: AC voltage: DC current: Resistance: Temperature: Safety classification: **U118071**  200 mV – 250 V, 5 ranges,  $\pm 0.8\% \pm 2$  digits 200/ 250 V, 2 ranges,  $\pm 1.2\% \pm 10$  digits 200  $\mu$ A – 10 A, 5 ranges,  $\pm 1,0\% \pm 2$  digits 200  $\Omega$  – 2000 k $\Omega$ , 5 ranges,  $\pm 0.8\% \pm 2$  digits 0 – 1000°C,  $\pm 2,0\% \pm 3$  digits CAT II 250 V (IEC-1010-1)

#### **Digital Multimeter P1035**

Compact  $3\frac{1}{2}$  digit multimeter for measuring voltage, current and resistance and also including diode and continuity tests. Complete with pouch, leads and battery.

DC voltage: AC voltage: DC current: Resistance: Safety classification: **U11806**   $\begin{array}{l} 200 \text{ mV}-600 \text{ V}, 5 \text{ ranges}, \pm0.5\%\pm2 \text{ digits} \\ 200/600 \text{ V}, 2 \text{ ranges}, \pm1.2\%\pm10 \text{ digits} \\ 2000 \mu\text{A}-10 \text{ A}, 4 \text{ ranges}, \pm1\%\pm2 \text{ digits} \\ 200 \Omega-2000 \text{ k}\Omega, 5 \text{ ranges}, \pm0.8\%\pm2 \text{ digits} \\ \text{CAT III 600 V (IEC-1010-1)} \end{array}$ 

# **FUNCTION GENERATORS**

Ð

### **ADVANTAGES**

- + Easy and accurate adjustment
- + With built-in continuous sweep-mode
- + Ideal for recording resonance curves

Ð

### **ADVANTAGES**

- + Ideal for introductory student experiments on AC
- + Simple generator for oscillations and waves

#### Function Generator FG 100 (230 V, 50/60 Hz)

Function generator with power amplifier for use in versatile student and practical experiments covering simple harmonic oscillation, AC electricity and induction. Featuring illuminated, digital display for frequency, signal form, offset and other parameters. The output is short-circuit protected as well as being protected against induced voltages and spark discharges, e.g. for when experiment leads are unintentionally pulled out while coils are connected. In internal sweep mode, one trigger pulse is output per cycle and the voltage output is proportional to the frequency. With retractable feet. Includes power supply.

Safety transformer conforming to EN 61558-2-6

Safe isolation between power supply and output circuits

Frequency range:	0.001 Hz to 100 kHz
Signal forms:	Sine, square, triangular
Offset:	0 to $\pm 5$ V, adjustable in 0.1 V steps
Output amplitude:	0 to 10 V, continuously adjustable
Power output:	10 W, permanent
Output current:	1 A, permanent, 2 A max.
Sweep modes:	External, continuous internal, individual internal
Frequency range:	1 Hz to 100 kHz
Time range:	0.04 s to 1000 s
External sweep:	Start via trigger pulse or application of
	0 to 5 V control voltage
Internal sweep:	Start and stop via Start/Stop button
	One trigger output per cycle plus
	proportional voltage
Power supply:	Plug-in power supply, 12 V AC, 2 A
Dimensions:	170x105x40 mm³ approx.
Additional features:	Fold-out feet
U8533600-230	

#### Function Generator SG10 (230 V, 50/60 Hz)

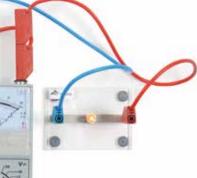

Sine-wave generator, which is particularly easy to use, featuring a power amplifier for use in student experiments. Includes 12 V AC plug-in power supply. One red and one green LED indicate the positive and negative half-waves of the output voltage. Their brightness corresponds to the configured amplitude. The way the output signal changes over time can be traced by means of an analogue voltmeter with zero-point in the centre or by means of an oscilloscope. The output is protected against short-circuits and against induced voltages as well as spark discharges.

- Safety transformer conforming to EN 61558-2-6

# **OSCILLOSCOPES**

## > NEW!

U11831

#### Digital Oscilloscope 2x30 MHz

Latest generation, dual-channel, digital storage oscilloscope with high-resolution colour display and large internal data memory.

- Mathematical functions including fast Fourier transforms (FFT)
- 20 Automatic measuring modes
- User-friendly operation featuring autoset and autoscale
- PASS/FAIL function implemented
- ${\scriptstyle \bullet}$  VGA output for connection to an external monitor
- LAN connection for remote connection via network
- USB connection for real-time data transmission or reading of internal memory

Includes two probes, two BNC cables, USB connecting cable, and software CD for Windows 2000/XP/VISTA/7/8/10. **U11831** 

## > NEW!

U11830

#### PC Oscilloscope, 2x25 MHz

Dual-channel, PC-based oscilloscope to be connected to a computer. Features powerful PC software for control and data requests. The highest possible degree of safety for users and the computer system thanks to galvanic isolation of the USB port.

- Mathematical functions including fast Fourier transforms (FFT)
- 20 Automatic measuring modes
- Data export for further processing (bin, txt, csv or xls)
- Image file for screenshots (png, bmp or gif)

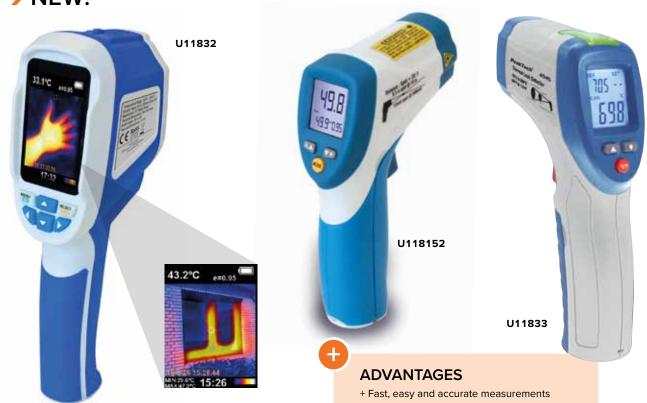

Includes two probes (1:1, 10:1), a USB connecting cable, two BNC cables, operating instructions and software CD for Windows® XP/ Vista/7/8 **U11830**

#### **Thermal Imaging Camera**

Modern infra-red thermal imaging camera for producing images of infra-red radiation from an object based on detected infra-red radiation in relation to the ambient temperature.

- User-friendly graphic menu operation
- Photography using built-in digital camera
- ${\scriptstyle \bullet}$  Up to 25000 photos can be saved on Micro SD card
- Recordings featuring time and date documentation
- · Images with emission factor and measurements
- Five colour palettes for thermal imaging
- Five levels of photograph and thermal imaging superimposition
- Cross-hairs, plus cold-spot and hot-spot display
- Minimum and maximum value display
- Automatic shut-off

Includes case, batteries, Micro SD card and instruction manual.

Temperature range:	-20°C 300°C
Resolution:	0.1°
Sensitivity:	0.3°C
Precision:	±2% or 2°C
Display:	60 mm (2.4") L0

# SOUND LEVEL METERS

#### Sound Level Meter P5055

Digital measuring instrument for universal application in detecting noise levels from a variety of sound sources over a broad range. Features built-in calibration signal plus maximum value and value hold functions. Slow mode for average noise level and fast mode for recording brief sound sequences and determining maximum noise level. A-weighting of frequency (based on human hearing) for openair measurements and also C-weighting, e.g. for measurements of engine noise. Robust plastic casing, analogue output for external measuring instruments, threaded hole for mounting on a stand. Foam-filled carry case.

#### NOISE ...

U11804

... damages hearing

- ... makes it more difficult to hear genuinely important signals
- ... impedes both physical and mental work
- ... disturbs and adversely affects well being
- ... disturbs relaxation and sleep
- ... can cause chronic stress, physical ailments and illness

#### **Noise Level Indicator SPL**

Handy and easy-to-use noise level meter with digital display in decibels (dB) and an arbitrarily adjustable trigger threshold for use as a traffic-light style noise indicator with a happy green face and a sad red face. Can be mounted on a wall or set up on a table top. Its well-conceived compact design makes it easy to transport. Automatically switches to electricity-saving stand-by mode when noise is low for a long period. The brightness of the display can also be adjusted. Includes a stand base, USB/miniUSB cable and USB power supply.

Display: Measuring range: Resolution: Thresholds for colour display: Voltage supply: Power consumption:

USB power supply: Dimensions: Weight: U10610

100 mm diam, with LED 40 dB to 130 dB 1dB

Adjustable to any level in steps of 1 dB 5 V DC via miniUSB socket 150 mA (normal operating mode) <1 mA (stand-by) 100 – 240 V, 50/60 Hz 130x145x12 mm<sup>3</sup> approx. 400 g approx.

# pH-METERS

#### pH Meter (2 in 1)

Digital pH meter for the simultaneous measurement of the pH value of aequous fluids and their temperatures. The measurement of the pH value is performed by determining the electrical potential difference between acidic, neutral and base fluids.

Robust, water-proof housing, large LCD display with permanent background illumination and simple to operate. Including calibrating solution, batteries and instruction manual.

pH range:	0 – 14 pH
Resolution:	0.01 pH
Accuracy:	± 0.05 pH
Temperature compensation:	0 – 50°C
Temperature measurement:	0 – 50°C
Resolution:	0.1°C
Accuracy:	± 1°C
Voltage supply:	4 x 1.5 V (AG-13) batteries
Protection class:	IP 65 water-proof
Display:	3½-digit LCD display, 11 mm, max. 1999
Dimensions:	190x35x35 mm <sup>3</sup> approx.
Weight:	100 g approx.
U11838	

#### pH Meter

Digital pH measuring instrument for the measurement of the pH value of aqueous liquids using the immersion probe tips to determine the electrical potential difference between acidic, neutral and basic liquids. The device has a robust housing with compact dimensions and is easy to operate. It is equipped with a large LCD display with continuous background illumination, 2 adjustment potentiometers for calibrating to pH = 4 or to pH = 7 using the matching screwdriver. Including calibration solution, screwdriver, battery and instruction manual.

pH range:	0 – 14 pH
Resolution:	0.01 pH
Accuracy:	± 0.05 pH
Temperature	
compensation:	0 – 50°C
Voltage supply:	9 V battery (NEDA 1604)
Display:	3½-digit LCD display, 18 mm, max. 1999
Dimensions:	150x70x25 mm <sup>3</sup> approx.
Weight:	230 g approx.
U11839	

#### **Digital Luxmeter**

Reasonably priced, easy to use pocket luxmeter for testing and measurement of light conditions. C.I.E. standard spectrum. Including light sensor, pouch and battery.

Voltage supply: Dimensions: Weight: U11803

Measuring ranges: 200 - 50000 lux, 4 ranges, ±5% 12 V battery (A23) 65x115x25 mm<sup>3</sup> approx. 160 g approx.

U11803

#### Laser Range Finder

> NEW!

Professional laser range finding instrument with multi-lined LCD display and background illumination especially designed for distance measurements of extremely high precision and for locations difficult to access. Speed buttons for direct and indirect measurement (according to Pythagoras), area and volume calculation, addition and subtraction operations. With internal memory for 99 recorded measurement values, retractable 90° bracket for precise targeting of the measurement point, spirit level and tripod socket. Including case, batteries and instruction manual.

Measurement range: Measurement units: Accuracy: Internal memory: Laser: Voltage supply: Display: Dimensions: Weight: U11827

0.05 – 60 m m (metre), in (inch), ft (feet) ± 2 mm 99 values 620 nm - 680 nm, <1 mW, class: 2 2 x 1.5 V AAA batteries Multi-lined multifunction display 118x54x28 mm<sup>3</sup> approx. 135 g approx.

# **GEIGER COUNTERS**

#### Geiger Counter

Versatile, easy to use and compact precision instrument for measuring  $\alpha$ -,  $\beta$ - and  $\gamma$ -radiation. With filter selection switch for filtering out types of radiation, large display and integrated USB interface. Including USB cable, Windows software, and operating instructions. The following functions and operating modes are available for measurement:

- Standard mode for displaying the current radiation level. Also equipped with variable acoustic and optical warning threshold signal and display of average radiation from previous day.
- Pulse counting either permanent or with variable gate time. Additional optional acoustic count indication.
- Count rate measurement.

U111511

- Integrated display of date and time.
- The number of pulses registered is stored in the internal memory. This facilitates recording e.g. of weekly values for up to 10 years.
- Computer docking station. The software enables the measured data to be evaluated and processed on an MS-Windows PC.

Radiation types:	α from 4 MeV, β from 0.2 MeV, γ from 0.02 MeV
Measured variables:	equivalent dose in Sv/h, mSv/h, μSv/h pulses/s, pulses/variable time interval
Display:	LCD, 4 digit, numerical with display of measured variable, quasi analogue bar chart, operating mode indicators
Radiation detector:	End window Geiger-Müller counter tube, stainless steel housing with neon-halogen filling
Measuring length:	38.1 mm
Measuring diameter:	9.1 mm
Mica window:	1.5 – 2 mg/cm <sup>2</sup>
Gamma sensitivity:	114 pulses/min for ${}^{60}$ Co radiation = 1 $\mu$ Sv/h in background radiation energy band
Background rate:	10 pulses per minute approx.
Internal memory:	2 kilobytes
Battery life:	3 years approx.

#### **Dosimeter Radex RD 1706**

Used for determining dose rates in  $\mu Sv/h$  for  $\beta\text{-},\gamma\text{-}$  and X-rays, this radiation meter can be operated by non-professionals while nonetheless offering the features of a professional dosimeter. Including two built-in Geiger-Müller counter tubes and a large, illuminated LCD display. The device measures the activity of  $\beta$ -and  $\gamma$ -particles and uses the results to calculate the dose rate. Detection of each particle is indicated by an audio signal to facilitate searching for radioactive sources. The difference between the mean dose rate and background radiation level, as well as the background radiation level itself are displayed in the "background" mode. Measured values remain saved after the device has been turned off.

#### Geiger-Müller Counter Tube

Self-quenching halogen pulse ionisation chamber for detecting alpha, beta, gamma and x-ray radiation. In metal housing with mica window, removable mounting clamp with shaft. Long plateau length.

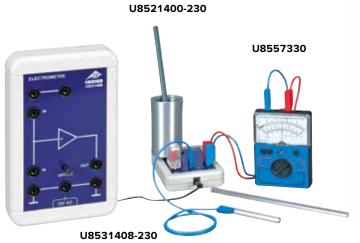

Filling:	Neon/argon mixture, halogen as quenching agent
Cathode dimensions:	approx. 39x14 mm <sup>2</sup>
Window:	mica, 9 mm dia.
Mass per unit area:	1.5 – 2.0 mg/cm <sup>2</sup>
Plateau length:	400 V – 600 V
Operating voltage:	400 – 600 V (recommended: 500 V)
Relative plateau slope:	0.04 %/V
Dead time:	90 µs
Limiting resistor:	10 M $\Omega$ , integrated in holder
Shaft:	100 mm x 10 mm dia. approx.

# MEASUREMENT AMPLIFIERS

#### Electrometer (230 V, 50/60 Hz)

Impedance converter with high-resistance input for measuring extremely small charges and currents. The input signal is converted into a proportional voltage, which can then be measured with an external voltmeter. During the measurement the potentials of the electrometer and the experimenter must be matched by using a metal rod connected to earth. Includes a 12 V AC plug-in power supply.

#### Measurement Amplifier U (230 V, 50/60 Hz)

Measurement amplifier U amplifies low-amplitude measurement signals from low-resistance signal sources for measurement with any chosen voltmeter or oscilloscope. By using an external shunt resistor it is also possible to measure small currents. Offset voltages can be compensated using coarse and fine offset adjustment knobs. Amplification (gain) can be selected in ranges from 0 to 5 powers of ten. High-frequency noise or other interference signals are filtered out by means of a low-pass filter with step-wise selectable time constants between 0 and 3 seconds. The output voltage has the same sign as the input voltage.

#### **Electrometer Accessories**

Set of accessories for carrying out basic experiments on electrostatics, electricity and the photoelectric effect in combination with an electrometer (1001025) and 450 V DC power supply (1008535).

#### Contents:

- 1 Faraday cup
- 1 Pair of friction rods
- 1 Metal rod with 4-mm drilled hole
- 1 Safety adaptor socket
- 1 Plug-in capacitor 1 nF
- 1 Plug-in capacitor 10 nF
- 1 Plug-in resistor 100  $M\Omega$
- 1 Plug-in resistor 1 G $\Omega$
- 1 Plug-in resistor 10  $G\Omega$
- 1 Zinc electrode
- 1 Grid electrode U8531420
